

Hansa Luftbild

Transforming Geo Information into Solutions

Hansa Luftbild AG is a globally operating provider of solutions in the areas of geo consulting, project management, aerial surveys, mobile mapping, photogrammetry, geo information and geo software services. To strengthen our team permanently from the earliest possible date we are currently looking for a

System and Network Administrator (m/w/d)

You are the committed colleague to support our team responsible for network and system management.

Your responsibilities:

- maintaining and developing our existing system environment
- monitoring our system and safeguarding data processing in each of our departments
- procuring hardware and software
- inhouse-consulting re technical solutions
- supporting our staff

Your profile:

- completed vocational training, e.g. as a qualified IT specialist in the field of systems integration, or a comparable education
- work experience in the areas of system and network administration
- very good knowledge of current operating systems, specifically Linux (e.g. Ubuntu, Debian)
- good understanding of large-sized high performance storage solutions
- good command of spoken and written English
- analytical intellectual capacity
- very good communication and teamwork skills

Additional advantageous knowledge and/or experience re

- backup solutions, specifically Quest, NetVault Backup
- virtualisation solutions (VMware, Hyper-V, Docker)
- data bases such as Oracle, PostgreSQL or MySQL
- scripting languages (e.g. Bash, Perl or Python)
- Microsoft Windows, Active Directory and Office 365
- Jira/Confluence administration

We offer

- challenges in the international market setting of the dynamic geo data industry
- an open-minded work atmosphere in a committed team with flat hierarchies
- individual working time models and family support
- a salary commensurate with your performance and qualifications
- individual further-training and personnel-development opportunities
- a varied occupation
